Though the visitors made five errors their ficiding was fast at times. They worked in two double plays, one of them coming in the fourth which retired the locals with three men on bases. Harris started a double for the Twins in the third by catching out the batter and throwing a runner out off first.

The locals got two runs in the second inning when, after Murphy had fanned, slowly and the siniles of th Hall rapped out a long drive to left which he stretched into a three-base hit by a close margin and scored on Shea's single to center. ## Boom! Boom!! Boom!!!

That's the way Grant's guns thundered at Vicksburg and Lee's guns thundered at Fredericksburg. Each of them thundered a little louder than the other fellow at each place and won the battle.

The war is over long ago, but booming still

Make this town and the country around it your battleground, and then boom!

If you boom loud enough, people will come from afar off to find out what's up. Then a little more booming will take them prisoners and add them to the population. Then they will begin booming, and other will-

ing captives will come in. This is the inside history of every town on earth that amounts to anything more than a hill of beans.

Booming may be done in many ways. A board of trade can do it. A commercial club or business men's club can do it. You can do it individ-

If you don't believe in this town, why do you live here? If you do believe in it, why don't you beom it? Every new family means money in your pocket if you are in business here or own property here. If you make your living by working here, every increase of population tends to increase your wages, every new industry brought to town tends to enlarge your opportunities for making a good living.

Batteries in a battle boom together. If only one gun booms now and then it helps some, but when they all boom together something big is going to happen right off. It's just the same with town booming. When we all boom together, the things we desire to have happen will begin hap-

Now, suppose you who read this suggest through the columns of this paper some method of massing our boom batteries and making a noise that will bring people running into this town to go into business, start a factory, develop some of our natural resources.

Manchester, July 15, In a medal Report on Harriman Railroad Doings

COMPETION

Oldest Man in Bennington County, Vt., Significant Development of the Railroad Operations. Issuance of Securities Should Be Regulated by the Commission.

> Washington, July 15 .- A report was made public Saturday by the interstate ommerce ocumulasion of its inquiry, into the railroad operations of Edward H. Harriman and of the operations of the so-called Harriman lines of railway which has been in progress for several months. The report, which written by Commissioner Franklin K. Lane, is the manimous expression of the commisaion. Copies have been transmitted to President Roosevelt and to the de-

partment of justice. It is expected by the commission that it will be determnied by the president and attorney general Bonaparte, from the statement of facts set out in the report, whether the government will institute any sort of proceedings against Harriman or the corporations involved in the inquiry. No ommendations are made by the commission that either criminal or civil prosecutions be instituted as a result of its inqury.

The report is a sumary of the evidence aducted at several hearings held by the commission. It enters fully into a discussion of the policy pursued by Mr. Harriman in obtaining and maintaining control of the various lines of railway in the complete system, and presents a fairly complete history of the perations of the various lines. Experts from the verbatim testimony of Mr. Harriman are given to show, as stated in the report, "that it is only the law which prevents the concentration into Mr. Harriman's hands of every railroad line lying between Canada and Mexico," is the frank admission of Mr. Harriman himself made at the hearing. "To gather under one head all transcontinental lines, or as many as possible and to exclude the coming of all com-petitors became manifestly the Harri-man policy, which was inaugurated in 1901 by the issuance of \$100,000,000 of convertible bonds by the Union Pacific." Mr. Harriman's eventual control of many of the competing transcontinental lines was prevented it is pointed out, by the supreme court's decision in the Northern securities case. It is shown by the report that it has been no part of the Harriman policy to permit the properties brought under Union Pa-cific control to decline, as in every case they are better today than they were

when Mr. Harriman acquired them. Particular stress is faid by the commission on elimination of competition in transcontinental business among the Harriman lines, and the commission indicates that this is a matter of large dicates that this is a matter of large significance developed in its inquiry. Special reference is made to the deal by which Mr. Harriman secured control of the San Pedro road and to the manipulation of the Chicago and Alton, a very careful synopsis of the financial operations in both instances being account of the Chicago and Concerning the Chicago and given. Concerning the Chicago and Alton transaction, the commission says: "It was admitted by Mv. Harriman that there was about \$60,000,000 of stock and habilities issued, against which no property had been acquired, and this s undoabtedly an accurate estimate.
